## RESUMEN PROFESIONAL

Junior Full Stack Developer with real-world experience in web development, both on the client and server side. Proficient in React.js, Node.js, and relational databases such as MySQL. My profile is enhanced by UX/UI training and strong skills in communication, teamwork, and AI integration. I aim to contribute effective solutions and grow as a developer within a collaborative team.

## TECNOLOGÍAS Y HERRAMIENTAS

Frontend: HTML, CSS, JavaScript, React.js, Figma

Backend: Node.js, Express.js

Databases: MySQL, SQL Server

Other Technologies: Git, GitHub, REST APIs, GitHub Copilot, ChatGPT 4o

Methodologies: Agile, Scrum (basic knowledge)

## EXPERIENCIA RELEVANTE

- Healthcare Management System | Personal Project – 2024
  - Developed a web application for healthcare professionals with electronic medical records, appointment scheduling, and prescription management.
  - Includes role-based login (doctor, secretary, admin), dashboards, patient filters, and medical calendar view.
  - Technologies: React.js, Node.js, MySQL.
  - <https://github.com/francocor/HistoriasClinicas>
- Landing Page with Appointment System | Nefrogem Nephrology Center – 2024
  - Designed an institutional website providing information about medical staff, specialties, and patient services.
  - Integrated an online appointment system to streamline healthcare access.

- Technology: React.js.
- <https://github.com/francocor/Nefrogem>
- Web Portal and Internal App | Hospital de San Pablo (Tucumán, Argentina) – 2024
  - Created a public website to inform the community about services, specialties, and prevention campaigns.
  - Developed an internal web app for hospital staff to manage documents and expedite administrative tasks, with secure login access.
  - Technologies: React.js, Node.js, MySQL.
