FULL STACK DEVELOPER | FRONTEND DEVELOPER | BACKEND DEVELOPER | REACT | NODE.JS | TYPESCRIPT

PROFESSIONAL SUMMARY

Technical University Programmer focused on full stack development, web application development, API integration, databases, and digital solutions for real business processes. I work with React, Next.js, JavaScript, TypeScript, Node.js, Express, SQL, MySQL, PostgreSQL, Supabase, Postman, Git, and GitHub. I have experience in healthcare systems, management tools, internal platforms, and digital products, building responsive interfaces, CRUDs, forms, role-based workflows, validations, frontend-backend integrations, debugging, and continuous improvement. I also use AI tools applied to software development to accelerate analysis, prototyping, code review, documentation, and workflow automation.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Vite, responsive design, reusable components, forms, API consumption, and UX/UI.
Backend: Node.js, Express.js, REST APIs, service integration, business logic, role-based authentication, CRUDs, data validation, and debugging.
Databases: SQL, MySQL, PostgreSQL, SQL Server, MongoDB, Supabase, data modeling, and relational queries.
Tools: Git, GitHub, Postman, VS Code, Visual Studio, Figma, Cloudflare Pages, Power BI, Excel, and Word.
AI-assisted development: Claude Code, ChatGPT, Kilo Code, and OpenCode for assisted development, debugging, code review, documentation, prototyping, and automation.

PROFESSIONAL EXPERIENCE

AI Platform Engineer - Claude Coder / Full Stack & Platform Support

BuildShare Development Capital Inc. / BuilderK | Remote | 2026 - Present

- Participate in the development, validation, and improvement of internal platforms focused on operations, project management, and AI-powered automation.
- Support platform features built with React, Vite, Supabase, Tailwind CSS, and Cloudflare Pages.
- Use Claude Code, ChatGPT, Kilo Code, and OpenCode for assisted development, debugging, code review, documentation, prototyping, and workflow optimization.
- Review interfaces, forms, navigation, permissions, user flows, data loading, and overall platform behavior.
- Detect, analyze, and follow up on functional, visual, technical, and data-related issues within internal modules.
- Propose functional and technical solutions to improve stability, usability, performance, and operational efficiency.
- Collaborate on internal process automation, platform support, and continuous improvement of features.

Frontend / Full Stack Developer | Freelance

2023 - Present

- Develop web applications for healthcare, management, and digital product projects.
- Build modern and responsive interfaces with React, JavaScript, TypeScript, and Tailwind CSS.
- Develop and integrate REST APIs between frontend and backend services.
- Implement CRUDs, forms, role-based workflows, validations, and navigation logic.
- Work with relational databases, structured data, and information validation.
- Perform debugging, bug fixing, functional testing, and continuous feature improvement.

RELEVANT PROJECTS

Harmonia | Web App for Electronic Health Records Management

React | Node.js | Express | PostgreSQL | Tailwind CSS

- Developed interfaces for patient management, appointments, consultations, and medical records.
- Implemented role-based views for administrator, healthcare professional, and secretary users.
- Created reusable components, forms, and responsive screens.
- Integrated frontend and backend through REST APIs and performed functional validation of forms and navigation.

Hospital San Pablo | Hospital Management System

React | JavaScript | Node.js | MySQL

- Developed admission and appointment management modules.
- Implemented different views according to user profile and adapted interfaces for front desk and tablet usage.
- Integrated backend services, validated forms, and improved administrative workflows.

Nefrogen | Platform for Nephrology Clinic

React | Node.js | MySQL | Tailwind CSS

- Developed frontend modules for patients, clinical evolution, treatments, and reports.
- Built reusable components and views for complex medical information.
- Improved readability, visual hierarchy, usability, and component behavior.

NovaRetail | E-commerce Business Analysis Project

SQL | MySQL | Power BI

- End-to-end data analysis project covering sales, customers, products, marketing, and returns.
- Cleaned, validated, and analyzed data in MySQL.

- Built SQL queries for key metrics and developed Power BI dashboards.
- Identified trends, anomalies, and business improvement opportunities.

EDUCATION

Technical University Programmer - Universidad Tecnologica Nacional (UTN)

ADDITIONAL TRAINING

- UX/UI Design - CoderHouse
- Front-End Web Development - CoderHouse
- Front-End Web Development - Argentina Programa
- Web Design - Open Education
- Continuous training in web development, applied AI, testing, data analysis, and digital products.

LANGUAGES AND COMPETENCIES

Languages: Spanish: Native | English: Technical intermediate.
Competencies: problem solving, analytical thinking, attention to detail, effective communication, organization, adaptability, teamwork, autonomy, continuous learning, and results orientation.
